General : 1 change(s)

Bug Fix : 1 change(s)

GXManage: Pricelist Management - Issue on 'Add tariff-codes to multiple pricelists' button

Dev Ref: 45959

Related Issue: No Issue

Fixed the issue where adding multiple tariff codes to a price list would incorrectly overwrite or update the unit types of existing codes. The "Add multiple tariff codes to pricelists" feature now safely ignores any codes that have already been added.
