Debtor/Patient SMS permission not set by default

Dev Ref: 39556

Related Issue: 857785, 834231, 878453, 878448, 878445, 878423, 878437

Fix issue where _Allow SMS permission_ on debtor is not set when creating the debtor from GoodXWeb.

MedDebs: Admittance - Debtor status changed to Normal issue

Dev Ref: 39775

Related Issue: 868273

Addressed the status issue so that the system will handle a null status (web) accurately.

MedDebs: Transactions - Journals posts as single lines for each item instead of one journal line

Dev Ref: 39744

Related Issue: 860031, 869214, 879251

Addressed the issue where debtor journals did not consolidate into a single journal entry per invoice when multiple items were journaled. Previously, a separate journal line was created for each item. The system will now post debtor journals based on the VAT setup of the original invoice, resulting in one journal per VAT type instead of per item.

GXManage: Pricelist Management - Import Medprax files directly from the local machine

Dev Ref: 39873

Related Issue: No Issue

Development to enable the "Import PG Data" button on the "Pricelist Management" screen to be used for manually importing medical aid packages in the Medprax file format has been completed. When clicked, the button will display a menu allowing users to choose between importing price collections or medical aid files. This option may be quite slow and is primarily intended for use by support staff.

GXManage: Pricelist Management - Unable to make items inactive across price lists

Dev Ref: 39164

Related Issue: 845627

Development to allow modification of the code types "Extra billing code", "Billing code - zero tariff", and "Locum modifier" across all price lists has been completed.

GXManage: Pricelists - VAT_ID defaulting to entity rate, not pricelist rate.

Dev Ref: 39883

Related Issue: No Issue

1. Several billing issues affecting non-South African sites have been successfully resolved.
2. The price-collection list, which previously indicated the list-country using a flag icon, has been updated to use text, enabling a more flexible and inclusive representation of multiple countries. The "Local FD" column has been removed as it is no longer relevant.
