

General : 4 change(s)

Bug Fix : 4 change(s)

Financial Reports: Debtors - Error when generating the "Patient Per Diagnosis Report"

Dev Ref: 39938

Related Issue: 873366

Addressed the SQL error that occurred when generating the Patient Per Diagnosis Report.

GXManager: Global Lists - Ledger Levels sorting screen layout on Ledger Manager

Dev Ref: 40752

Related Issue: No Issue

Addressed a layout issue on the Set Print Order screen in Ledger Manager and enabled screen maximization.

MedDebs: Batch Transactions - Payment plan Re-calc function causes error

Dev Ref: 40721

Related Issue: 898223, 899110, 903401, 897356, 897524

Addressed the following issues and implemented updates to the Payment Plan functionality:

- Primary invoice number now updates correctly when the invoice is redone.
- Remaining installments calculation fixed for accurate results.
- Recalc Amounts button stays inactive until the plan is saved, preventing incorrect calculations.

MedDebs: Invoices - Modifier 0069 with 0005 causes endless calculation loop

Dev Ref: 40211

Related Issue: 879388

Addressed an issue where using modifier 0069 together with modifier 0005 caused an endless calculation loop when "Recalculate add modifiers" was enabled.
