General : 1 change(s)

Bug Fix : 1 change(s)

MedDebs: Admittance - New patient saving as 'Private'

Dev Ref: 46667

Related Issue: No Issue

Addressed the issue where new patients were saved as 'Private'.

Hospital : 1 change(s)

Bug Fix : 1 change(s)

Hospital: Invoice - Negative markup billed on stock items with no configured markup

Dev Ref: 46363

Related Issue: 1021929

Addressed the issue where hospital stock items (materials and medicine) billed a negative markup when no markup was configured at item or supervisor level. This occurred when switching selection between items on the stock list (clicking away from the default-highlighted item and back), causing markup to recalculate incorrectly instead of resolving to zero - resulting in the item being billed at a loss.
