Diary: Invoice - Generics not considering active status or stock on hand

Dev Ref: 41432

Related Issue: No Issue

The following feature enhancements have been made to generics section in the invoice screen:

Default View:

- On screen load, only active generic items are displayed.
- Each active item shows its corresponding stock-on-hand value in the dedicated column.

"Show inactive items" Option:

- A new checkbox, labeled "Show inactive items", has been added.
- The checkbox is unchecked by default.
- A hover tooltip is available: "Check to include inactive stock items in the list."

Inactive Item Visibility:

- When the checkbox is selected, inactive items are displayed alongside active items.
- Inactive items are visually distinguished from active ones.
- When the checkbox is deselected, the list reverts to showing only active items.

Stock-on-hand Values:

- Both active and inactive items display their respective stock-on-hand values when visible.
