

General : 4 change(s)

Bug Fix : 3 change(s)

Clinical Event: Script - Unable to send event marked as "clinical" via email

Dev Ref: 40221

Related Issue: 873515

Addressed the issue where the user was unable to send a workflow event marked as clinical via email.

Diary: Clinical Event - When System notes are completed the specific system should go into checked state and display red

Dev Ref: 40135

Related Issue: No Issue

Functionality has been added to the Eye Eval 2 form where when system notes are completed the specific system should go into checked state and display red.

Hospital: Case account - Error when trying to upload documents (Warning 'id_key')

Dev Ref: 40082

Related Issue: 876474

Addressed the issue where an error occurred during document upload, preventing users from successfully uploading files. Kindly note that files uploaded from a Debtor context will now open with the default Document Classification set to Debtor and files uploaded from a Case (hospital) context will now open with the default Document Classification set to Case.

New Feature : 1 change(s)

Configuration: Workflow Event Configuration - Add AI and Patient Dashboard routing for Eye Eval

Dev Ref: 40199

Related Issue: No Issue

New development has added 4 new widgets (Date, Date time, Time and Boolean) to the Eye Eval 2 workflow event. These fields are also available in the Setup AI function of the form.
