Release Notes

26 June 2019

Release Version : GoodX Web App v1.2.1

6 change(s)

Program Improvements

[Import Screen - MyGC/Logbox] Previously only the Debtor, ID Number and Medical Aid fields displayed when importing a patient from MyGC/Logbox. The following fields were added to the import screen to improve the ease of use: Email, Patient Cellphone Number, Patient ID, Main Member, Medical Aid, Date.

[Settings - Diary Settings: Automatic SMS Reminders] Added a function that will allow the user to choose an SMS template for automatic booking reminders. (Odoo No: 220287,219994)

Bug Fixes

[Admin Screen - ERA Management Tab: Filter] The unexpected error that occurred when checking the line item linking while in the ERA Edit screen has been resolved. (Odoo No: 228008)

[Clinical History - View Pathology Result] The PDFs on the PdfReport and Pathology Events that loaded into a very small frame on the clinical history screen will now display in full size again. (Odoo No: 228054)

[Settings] The warning message “Warning: Invalid input syntax for uuid” that popped up, when trying to save changes in the settings screen has been resolved. (Odoo No: 228208)

New Features

[Clinical Case - Script] A real time drug interaction checker has been implemented on the script. A red exclamation mark icon will appear if the drugs that are added on the script interact with each other, hovering over the icon will show the interaction between the drugs.
