Release Notes

03 July 2019

Release Version : GoodX Web App v1.2.2

7 change(s)

Program Improvements

[Medical History - Allergies] Added a “No Allergies” checkbox on the medical history screen. When the no allergies checkbox has been checked, the medical history summary will display the allergies as “None”. If no allergies have been captured and the “No Allergies” checkbox has not been checked, the medical history summary will display the allergies as “Not Captured”. (Odoo No: 227829)

[Script Print Out: Non-substitutable] Non-substitutable did not print on the script printout, even if it was selected, this has now been resolved and will print on the script. (Odoo No: 217513, 182239)

[Medical History - Chronic: Script Items] Previously when entering the first script item in the chronic section in the medical history it was restricted to 1 character, this has been amended. (Odoo No: 228880)

Bug Fixes

[Clinical Case - Sick Note/Script: ICD10] The ICD10 code added on the invoice will now be copied to the sick note and script as it previously functioned. (Odoo No: 227674,228873)

[Account Details] The error message that appeared in the bottom right corner of the screen when opening account details has been fixed. (Odoo No: 228242)

[Script - Macro/Favourites: Allergy Detection] Previously a user could add script items via macros or favourites without the allergy warning pop-up appearing, this has now been fixed and the allergy warning will pop up if items that the patient is allergic to are added from macros or favourites. (Odoo No: 21711)

[Invoice Screen] When changing the treating doctor or service centre on the booking the invoice will be updated with the changed details. (Odoo No: 229191, 228825)
