Release Notes

09 July 2019

Release Version : GoodX Web App v1.2.3

8 change(s)

Program Improvements

[Settings - Entity Settings: Authorisation] A setting has been added to the entity settings that when applied will automatically add authorisations and authorised codes that were preset on the patient to invoices that match the date of the authorisation. If more than one authorisation is available, the user is prompted to choose between the available authorisations. (Odoo No: 219287)

[Patient Label - Referring Doctor] The referring doctor has been added to print on the patient label. (Odoo No: 225294)

Bug Fixes

[Switch Details Tab] Fixed the "entity_id" error that occurred when sending a Proof of Submission from the switch details tab. (Odoo No: 229533, 216886)

[Invoice Screen - Post Invoice] A bug that was encountered when posting invoices after changing the treating doctor or service centre on the booking or invoice screen has been fixed. (Odoo No: 230113, 230032)

[ERA Management - Error on matching] The error message that popped up and caused that the user was unable to post the ERA when trying to use the match all, auto-allocate or resolve functions on the ERA edit screen has been resolved. (Odoo No: 229064)

[Invoice Screen - Tooth Surface Level] Removed the constraint that blocked users from posting invoices when surface details were omitted. (Odoo No: 229713)

[Invoice Screen - Referring Doctor] The referring doctor that was added on the debtor edit screen or booking screen previously did not set and claims were rejected by the medical aid for referring doctor details, this issue has been resolved. (Odoo No: 230206)

[Debtor Edit Screen - Patient Linking] The error, “duplicate key value violates unique constraint ‘patallergymap_key’” that was received when trying to link or unlink a patient from another patient in the patient linking screen in the debtor edit screen has been fixed (Odoo No: 230234)
